Part II Course Details

1. Abstract

The focus of this course is on the ‘critical’ study of discourse, specifically in terms of how the use of language and other semiotic resources is implicated in (re)producing and perpetuating ideological interests and power relations in contemporary society. Students will be introduced to conceptual and analytic frameworks for the critical investigation of linguistic and visual data in various social domains and institutional settings, such as politics and governance, media and advertising, and corporate branding and communication, and be sensitized to how semiotic features reflect and enact particular ideological underpinnings, authority relations, and social currents.
