City University of Hong Kong Course Syllabus

offered by Department of Management Sciences with effect from Semester A 2024/25

Part I Course Over	view
Course Title:	Business Analytics and Decision Modelling
Course Code:	FB5731
Course Duration:	One Semester
Credit Units:	2
Level:	P5
Medium of Instruction:	English
Medium of Assessment:	English
Prerequisites : (Course Code and Title)	Nil
Precursors: (Course Code and Title)	Nil
Equivalent Courses : (Course Code and Title)	Nil
Exclusive Courses: (Course Code and Title)	MS5731 Quantitative Methods (From the old curriculum)

1

Part II Course Details

1. Abstract

This course aims to:

- Provide students with the key concepts, knowledge, and tools to use data, analytical models and information technology to support practical managerial decision-making
- Develop students' basic skills and hands-on experiences to uncover useful information and solve real business problems by analyzing the complex data sets, and to derive the best possible decisions to gain a company competitive advantages and enhanced capabilities in better dealing one's daily business decisions
- Expose students to the best practices and successful stories of how management science or quantitative methods has generated significant business values and competitive advantages for organizations

2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

No.	CILOs	Weighting	Discov	ery-en	riched
		(if	curricu	lum re	lated
		applicable)	learnin	g outco	omes
			(please	tick	where
			approp	riate)	
			A1	A2	A3
1.	Discuss basic knowledge in the concepts, principles	30%			✓
	and benefits of some most widely used management				
	science techniques and their applications				
2.	Apply some basic management science tools of data	30%		✓	✓
	analysis, modelling and information technologies to				
	solve and to analyze some real managerial				
	decision-making problems				
3.	Demonstrate the evaluation of the managerial	20%		√	/
	applications of some basic quantitative methods				
4.	Explain the analytical results and solutions to	20%	√	1	
7.	non-quantitative managers and practitioners	2070	*	*	
	non-quantitative managers and practitioners	1000/			1
		100%			

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

3. Learning and Teaching Activities (LTAs)

(LTAs designed to facilitate students' achievement of the CILOs.)

LTA	Brief Description	CI	LON	lo.			Hours/week
		1	2	3	4		(if
							applicable)
Lecture	Student will identify the concepts and general knowledge of logistics and supply chain operations and the applications of management science techniques in logistics and supply chain decision analysis	✓	✓	✓	✓		
Lab sessions	Students will demonstrate hands-on exercises using computer software, such as Microsoft Excel, to solve managerial decision-making problems by applying learnt quantitative techniques.	√	√	√	√		
Tutorials	Students will describe real case analyses and discussions, elaborating on how these cases provide practical insights and real-world applications of theoretical concepts.	√	√	√	√		
Reading	Students will critically engage with the Supplemental reading materials on successful stories and industrial practices.	√	√	√	√		

4. Assessment Tasks/Activities (ATs)

(ATs are designed to assess how well the students achieve the CILOs.)

Assessment Tasks/Activities	CILO No.				Weighting	Remarks		
	1	2	3	4				
Continuous Assessment: 60%								
1. Course Assignments	\checkmark	✓	✓	✓			50 %	
2. Class Participation	✓	✓	✓	✓			10%	
Examination: 40% (take home and /or duration: 3 hours, if applicable)								
1. Written Examination	✓	✓	✓	✓			40%	
						•	100%	

5. Assessment Rubrics

(Grading of student achievements is based on student performance in assessment tasks/activities with the following rubrics.)

Applicable to students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter

Assessment Task	Criterion	Excellent	Good	Fair	Marginal	Failure
		(A+, A, A-)	(B+, B, B-)	(C+, C, C-)	(D)	(F)
1. Course	Understanding the	High	Significant	Moderate	Basic	Not even reaching
Assignments	concepts and					marginal levels
	methods of some					
	most widely used					
	management science					
	techniques and their					
	applications					
2. Class	Contribution through	High	Significant	Moderate	Basic	Not even reaching
Participation	readings, in-class					marginal levels
	exercises, and active					
	and insightful class					
	participation.					
	Punctual and nearly					
	full attendance					
3. Written	Capability to solve	High	Significant	Moderate	Basic	Not even reaching
Examination	the problems, and					marginal levels
	with clear key points					
	covered for open-end					
	questions					

Applicable to students admitted from Semester A 2022/23 to Summer Term 2024

As	sessment Task	Criterion	Excellent	Good	Marginal	Failure
1.	Course Assignments	Understanding the concepts and methods of some most widely used management science techniques and their applications	(A+, A, A-) High	(B+, B) Significant	(B-, C+, C) Moderate	Not even reaching marginal levels
2.	Class Participation	Contribution through readings, in-class exercises, and active and insightful class participation. Punctual and nearly full attendance	High	Significant	Moderate	Not even reaching marginal levels
3.	Written Examination	Capability to solve the problems, and with clear key points covered for open-end questions	High	Significant	Moderate	Not even reaching marginal levels

Part III Other Information (more details can be provided separately in the teaching plan)

1. Keyword Syllabus

(An indication of the key topics of the course.)

Introduction to Modelling and Management Science

Modelling for Managerial Decisions. Quantitative vs. qualitative Problem Solving Process. Use and Implementation of Modelling

Basic Concepts in Probability and Statistics

Expected Values. Standard Deviation. Normal Distribution. Concepts of Sampling. Estimation and Confidence Intervals. Data analysis using Excel

Regression Analysis

Simple Linear Regression models. Estimation and prediction suing regression method. Interpretation of regression parameters and coefficient of correlation.

Introduction to Data Mining

Predictive models. Cluster analysis. Market basket analysis.

Constrained Optimization techniques

Optimization modelling. Linear Programming formulation. Using Excel Solver to solve constrained optimization problem. Other constraint optimization models (including Integer and Non-linear programming problems) and their applications.

Multiple Objective Decision Making Techniques

Multiple objective decision problems and decision making tools. The Analytical Hierarchy Process.

Simulation Modelling and Analysis

Simulation concepts and modelling. Excel simulation and managerial applications

Implementation Issues

Success, challenges and issues in quantitative managerial decision support. Uses and abuses of quantitative results in real-Life situations. Strengths and limitations of quantitative models.

2. Reading List

2.1 Compulsory Readings

(Compulsory readings can include books, book chapters, or journal/magazine articles. There are also collections of e-books, e-journals available from the CityU Library.)

1.	Nil		

2.2 Additional Readings(Additional references for students to learn to expand their knowledge about the subject.)

1.	S. Christian Albright, Wayne Winston, Christopher Zappe, Data Analysis and Decision Making
	with Microsoft® Excel, Revised, 3 rd Edition, ISBN-10: 0324662440, ISBN-13:
