Part II Course Details

Abstract

The objective of this course is to provide students with the necessary skills to analyze complex supply chain scenarios, effectively present and communicate with business clients, and compose impactful business reports. Students will be assigned to a series of demanding business cases related to operations and supply chain management (SCM), where they will be tasked with resolving business issues using the knowledge gained from the program, either individually or as a team. The course is designed to prepare students for job interviews, business consulting roles, and entry-level management positions in the operations and supply chain management field.

Course Intended Learning Outcomes (CILOs)

CILOs	Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3	
1	Apply knowledge from SCM, Logistics and other business areas to identify critical issues in a complex business case.	20	x	x	
2	Utilize the fundamental concepts, principles, and analytical tools from SCM to devise solutions for the given business challenges.	30		x	
3	Confidently and effectively present their solutions in both verbal and written formats.	30	x	x	x
4	Actively participate in class discussions and demonstrate the ability to work collaboratively in teams to solve complex problems, including emerging trends and technologies, ethical, social, and environmental responsibilities.	20	x	x	x
