

Authoritarianism, Oligarchy, Localism or Democratization?

A framework for a comparative analysis of alternative responses to the climate crisis

Prof. Zlatko Bodrožić

Professor of Digital Enterprise
University of Liverpool, UK

Seminar Topic

There is considerable debate over alternative responses to the climate crisis. In this talk, Zlatko Bodrožić, discusses the strengths and weaknesses of four possible responses to the climate crisis defined by our collective choices as concerns organization models and public policy: Authoritarianism, Oligarchy, Localism, and Democratization.

Biography

Zlatko Bodrožić is a Professor of Digital Enterprise at the University of Liverpool, UK. His PhD is from the University of Helsinki, Finland. Zlatko's research focuses on radical transformation processes—in particular on the green transformation and the digital transformation. To explain and enable us to shape radical transformation processes, Zlatko studies the interplay of the evolution of technologies, organizational paradigms, and public policy (see for example *Administrative Science Quarterly*, 2018; *Organization Science*, 2022; *Production and Operations Management*, 2024; *Journal of Management Studies*, forthcoming). At the European Group of Organizational Studies conferences, he acts as co-coordinator of the Standing Working Group “Organization Studies in the Anthropocene: System Change, Not Climate Change” (2021-2026).
