Part II Course Details

1. Abstract

This course aims to provide students with basic knowledge and skills in social research methods which include setting research questions, collecting and processing data as well as analysing and presenting the research outputs. Particular emphasis will be put on the critical evaluation of research findings and the techniques student required for their capstone projects. Equal emphasis will be put on the quantitative and qualitative approaches of social research.

2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

No.	CILOs	Weighting	Discov	ery-eni	riched

2.	Critically evaluate findings from research			X		
3.	Design basic quantitative and qualitative research project				X	
	with appropriate data collection and data analysis tools					
4.	Produce research reporting in both written as well as oral				X	
	means					
5.	Illustrating the ethical issues in the research process		X

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

3. Teaching and Learning Activities (TLAs)

(TLAs designed to facilitate students' achievement of the CILOs.)

TLA	Brief Description	Cl	CILO No.			Hours/week
