City University of Hong Kong Course Syllabus

offered by School of Creative Media with effect from Semester A 2017 /18

Part I Course Over	view
Course Title:	Contemporary and New Media: An Archaeological Study
Course Code:	SM5335
Course Duration:	One semester
Credit Units:	3
Level:	P5
Medium of Instruction:	English
Medium of Assessment:	English
Prerequisites: (Course Code and Title)	Nil
Precursors: (Course Code and Title)	Nil
Equivalent Courses : (Course Code and Title)	Nil
Exclusive Courses:	Nil

Part II Course Details

1. Abstract

This course adopts Michel Foucault's concept of "genealogy" and "archaeology" to form the basis for critical revisionist historiography. On an art history level, the course adopts media archaeology as an alternative to the understanding of contemporary and media art. It seeks to develop a basic understanding of media art via an inter-disciplinary orientation. It provides an overview of the social context, aims and forms of contemporary art, with a strong emphasis on experimental film and video art, installation, performance, interactive and intermedia work, and modes of computational thinking in art practices. The main focus will be on *how media technologies are used in contemporary art practices*.

Beginning with a media archaeological approach and tracing developments in recording and presentation technologies, the course examines how media adds meaning and innovation to making art. The course also examines the conceptual threads of both media and art, and how media art making is part of a social practice contingent to a larger social-cultural-technological framework. Students are encouraged to explore media technology as an ever-changing variable that is open for scrutiny, recycling, transformation and subversion.

Key questions to be discussed pertain to the nature of artistic media, the interaction between art and technology, the ecology of information technologies, the social and political aspects of avant-garde art, the nature of experimentation, the meaning of interactivity, etc., all of which will be illustrated by key works from around the world. The course will also examine how the merging of art with science has occurred in various art movements over the past century and how the two are being linked today.

Students will conduct historical analyses of individual movements and artists, compare different theoretical perspectives, and familiarize themselves with key literature. A creative work could be an alternative by which students demonstrate an awareness of key conceptual and formal issues in contemporary and media art. Extensive class discussions and practical assignments will encourage students to reflect critically about the fundamentals of their activity as creative media artists.

2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

No.	CILOs	Weighting	Discov	very-en	riched
		(if	curricu	ılum re	lated
		applicable)		ng outco	
			(please	e tick	where
			approp	oriate)	
			A1	A2	<i>A3</i>
1.	Identify the concepts of media archaeology and the social			1	
	effects of early technological developments.				
2.	Recognize how individual moments of art experiments		1	1	
	used and reflected on media as part of their strategies				
3.^	Reflect on and theorize the ways media affect an artwork:		1		1
	particularly how new formal properties and meanings are				
	possible using emerging media				
4.^	Discuss the complexity and diversity of media art		1	1	1
5.^	Conduct independent research from a media archaeology			1	1
	perspective				
		100%			

[^] Negotiated Learning Outcome (NLO) explicitly articulating the elements of Discovery oriented learning.

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

3. Teaching and Learning Activities (TLAs)

(TLAs designed to facilitate students' achievement of the CILOs.)

TLA		CILO No.					Hours/week (if	
	1	2	3	4	5	6	applicable)	
Lectures	1	/	1	1	1			
Discussions on assigned readings (group presentation)		1	1	1				
Research Paper and/or New Media Artwork Proposal			1	✓	√			
Production of a New Media Artwork with an accompanying artist's statement describing the research process.			1	1	1			

4. Assessment Tasks/Activities (ATs)
(ATs are designed to assess how well the students achieve the CILOs.)

Assessment Tasks/Activities		CILO No.					Weighting	Remarks

100%

5. Assessment Rubrics

(Grading of student achievements is based on student performance in assessment tasks/activities with the following rubrics.)

Assessment	Criterion	Excellent	Good	Fair	Marginal	Failure
Task		(A+, A, A-)	(B+, B, B-)	(C+, C, C-)	(D)	(F)
1. Presentation	This assessment will grade on content and fluency of presentation. Students should show their co-operation to conduct a well-organized presentation with their own argument and evidence from readings and notes. The threshold of 'discovery' lies in a student's self initiatives to conduct additional research and to personalize theories for her/his personal daily experience.	 Rich, informative content, excellent grasp of the material with in-depth and extensive knowledge of the subject matter Rigorous organization, coherent structure, and systematic exposition with a strong sense of narrative Superior presentation skills: distinct pronunciation, fluent expression and appropriate diction, exact time-management Critical analysis with insightful comments opening up new issues, or suggesting the ability to theorize 	- Adequate content with firm grasp of the material that informs the audience on a subject matter - Reasonable organization, balanced structure and composition - Good verbal communication: comprehensible pronunciation, fluent expression and diction, fair time-manageme nt	- Adequate content with comprehensive grasp of the material demonstrating basic knowledge of the subject matter - Fair organization, weak structure and composition - Fair presentation skills: acceptable pronunciation, expression and diction, fair time-management	Weak content, loose grasp of the general ideas with some knowledge of the subject matter Poor organization, structure and composition Poor presentation skills: marginal pronunciation, expression and diction, poor time-management	 Inadequate content, fail to identify the general ideas with knowledge of the subject matter No organization, structure or/and composition Poor presentation skills: marginal pronunciation, expression and diction, minimal time-managemen t
2. Research Project/ Paper	Students should demonstrate ability to apply knowledge and skills to undertake independent research, build up argument and analysis. The threshold of 'discovery' lies in a student's proactively turning theory into praxis, to transform course material into self-owned authorship.	 Excellent grasp of materials, ability to explain key concepts, assumptions, and debates, demonstrating sound knowledge of the field Rich content, exceptional ability to integrate various resources into primary and secondary levels based on demand; Design and conduct 	 Firm grasp of materials, ability to explain key concepts and assumptions Adequate content, strong ability to integrate various resources into primary and secondary levels based on demand; 	 Comprehensive grasp of materials, able to explain key concepts Adequate content, fair ability to integrate various resources into primary and secondary levels based on demand Design and conduct research which is built on 	 Loose grasp of materials, cannot explain key concepts Weak content, with primary and secondary levels Design and conduct research which is appropriate for the research objective Marginal judgments about 	 Poor grasp of materials Inadequate content, without primary and secondary levels Fail to design and conduct research which is appropriate for the research objective Fail to make reasonable

Assessment	Criterion	Excellent	Good	Fair	Marginal	Failure
Task		(A+, A, A-)	(B+, B, B-)	(C+, C, C-)	(D)	(F)
T Work		research which is firmly built on thorough knowledge of existing theoretical frameworks Evaluative judgments about existing research and demonstrate application of strong critical thinking skills Strong ability to approach a text or a theme using a variety of theories and analytical tools Strong organization of research findings with effective organization and procedural clarity at the same time demonstrating the importance of the process Insightful suggestion of how the research findings may lead to future research	Design and conduct research which is built on thorough knowledge of existing theoretical frameworks Appropriate judgments about existing research and demonstrate application of critical thinking skills Ability to approach a text or a theme using a variety of theories and analytical tools	knowledge of theoretical frameworks Appropriate judgments about existing research Weak ability to approach a text or a theme using a variety of theories and analytical tools	existing research Poor ability to approach a text or a theme using a variety of theories and analytical tools	judgments about existing research Fail to approach a text or a theme using a variety of theories and analytical tools
3. Creative Project/ Technical Project/ Portfolio	Students should demonstrate ability to utilize primary and secondary sources, execute creative ideas and projects. The threshold of 'discovery' lies in a student's proactively turning theory into praxis, to transform course material into self-owned authorship.	 Work has strong affective quality and the articulation of personal styles and signature Excellent appreciation, exploration and/or application of the aesthetic and expressive qualities of the medium Work raises questions and instill insights about the process of conception, creative strategization and 	 Strong appreciation, exploration and/or application of the aesthetic and expressive qualities of the medium Ability to create project/ work that demonstrate the processes of thinking and 	 Basic appreciation and/or application of the aesthetic and expressive qualities of the medium Limited ability to create project/work that demonstrate the processes of thinking and creative exploration 	 Marginal appreciation of the aesthetic and expressive qualities of the medium Marginal ability to create project/ work that demonstrate the processes of thinking and creative exploration 	 No appreciation of the aesthetics and expressive qualities of the medium Fail to create project/ work that demonstrate the processes of thinking and creative exploration Minimal adjustment of

Assessment	Criterion	Excellent	Good	Fair	Marginal	Failure
Task		(A+, A, A-)	(B+, B, B-)	(C+, C, C-)	(D)	(F)
		production Innovative exploration by combining knowledge from different disciplines (e.g. mathematics, psychology, physics, anthropology, etc.) to create an inter-disciplinary project Efficient adjustment of plans and strategies in response to resources (time, space, equipment, etc) available with constructive adjustment	creative exploration Proper adjustment of plans and strategies in response to resources (time, space, equipment, etc) available and constructive feedback/ suggestions	- Adjustment of plans and strategies in response to resources (time, space, equipment, etc) available	- Limited adjustment of plans and strategies in response to resources (time, space, equipment, etc) available	plans and strategies in response to resources (time, space, equipment, etc) available

Note: All A+/A/A- grade assignment should comply with the highest performance of Discovery-oriented learning.

Part III Other Information (more details can be provided separately in the teaching plan)

1. Keyword Syllabus

(An indication of the key topics of the course.)

Media archaeology, open work, indeterminancy, what is media art, medium specificity, intermedia, happenings, events and performance, improvisation, drifting, embodiment, the place of objects, participatory art, socially engaged art, and urbanism, art as forms of mechanical and digital reproduction, cybernetics, digital technology and social media, feminism and art, immersion, tactical media, documentation and archiving as art, art and anthropology, the archaeology of sights and sounds, expanded and future cinema, visual imaging in a digital age, sound as art, art and the machine, computational thinking in contemporary art, the use of photography, multisensory ethnography

Indicative Course Outline

The following is a suggested outline. It may vary or be reconfigured in different versions.

Week 1-2	Introduction: the curious stories of 'media archaeology': a different way to examine the
	histories of art; archaeology of 20th -century art: innovations and frontier thinking; the
	place of photography and painting, conceptual art, space-oriented art
Week 3-4	The pivotal moments in 20th century art and paradigm cases: Dada and the Fluxus, <i>The 9</i>
	Evenings and Robert Rauschenberg's Ópen Score etc.
Week 5-6	Art as critique of society and the intervention of everyday life; art as experimental action
	beyond the Fluxus: S.I., Blast Theory, hacktivism, mods, tactical and networked media
Week 7-8	Archaeology of sights and sounds; expanded and future cinema, generative cinema;
	sound an interdisciplinary view
Week 9-10	Cybernetics, computational thinking in contemporary art

Week 9-10 Cybernetics, computational thinking in contemporary art
Week 11 Immersive Environments and performative narrativity

Week 12-13 Anthropology and art, archiving as artistic practice, multisensory ethnography; from objects to archives to database

2. Reading List

2.1 Compulsory Readings

(Compulsory readings can include books, book chapters, or journal/magazine articles. There are also collections of e-books, e-journals available from the CityU Library.)

	*This reference list is to provide key texts that inform the multi-tropic syllabus as well as
	provide the basic resources for research-based in-class presentations, group projects and the
	semester-end research paper.
	Archaeology (methodology and scope)
