## Part II Course Details

### 1. Abstract

This course aims to provide students with state-of-the-art design methods of urban design concepts by focusing on regional, territorial, and international issues in urban design and planning. The enquiries by design focus on developing new design strategies to solve a variety of urban problems in various cities. Students will be asked to use computational tools for analyzing contexts and visualizing strategies as well as creating innovative urban forms. The charrette will take place in the form of intensive design sessions and possibly multi-day meetings with selected potential stakeholders. The meeting schedule can vary every year based on the selected topic and stakeholder's availability.

### 2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

No.	CILOs	Weighting (if applicable)	Discovery-enriched curriculum related learning outcomes (please tick where appropriate)		
			A1	A2	A3
1.	identify urban issues occurring in various cities around the World and new advanced design methods		✓	✓	
2.	formulate design concepts and schematic design alternatives by adopting new advanced design methods		✓	✓	✓
3.	design an urban design project by developing new design logic and schemes for a selected city		✓	✓	✓
4.	prepare professional presentation and documentation of an urban design proposal for proposing a new urban design approach			✓	✓
		100%			

#### A1: Attitude

*Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.*

#### A2: Ability

*Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.*

#### A3: Accomplishments

*Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.*

### 3. Teaching and Learning Activities (TLAs)

## 5. Assessment Rubrics

(Grading of student achievements is based on student performance in assessment tasks/activities with the following rubrics.)

Assessment Task	Criterion	Excellent (A+, A, A-)	Good (B+, B, B-)	Fair (C+, C, C-)	Marginal (D)/ Pass (P) on P/F basis	Failure (F)
Assignment 1 (group)	Attitude to analyse existing contexts	Strong evidence of original thinking; good organization, capacity to analyse and synthesize; superior grasp of subject matter evidence of extensive knowledge base	Evidence of grasp of subject, some evidence of critical capacity and analytic ability; reasonable understanding of issues; evidence of familiarity with literature	Student who is profiting from the university experience; understanding of the subject; ability to develop solutions to simple problems in the material	Sufficient familiarity with the subject matter to enable the student to progress without repeating the course	Little evidence of familiarity with the subject matter; weakness in critical and analytic skills; limited, or irrelevant use of literature
Assignment 2 (individual)	Attitude to challenge conventional strategies in urban design Ability to develop design skills Accomplishment to demonstrate design alternatives	Strong evidence of original thinking; good organization, capacity to analyse and synthesize; superior grasp of subject matter evidence of extensive knowledge base	Evidence of grasp of subject, some evidence of critical capacity and analytic ability; reasonable understanding of issues; evidence of familiarity with literature	Student who is profiting from the university experience; understanding of the subject; ability to develop solutions to simple problems in the material	Sufficient familiarity with the subject matter to enable the student to progress without repeating the course	Little evidence of familiarity with the subject matter; weakness in critical and analytic skills; limited, or irrelevant use of literature
