## Part II Course Details

### 1. Abstract

The aim of this course is to enable students to demonstrate their ability to develop, plan and execute psychological research. It is designed to foster independent thinking and to encourage academic debate on significant issues and principles of psychological research via individual supervision.

### 2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

No.	CILOs	Weighting (if applicable)	Discovery-enriched curriculum related learning outcomes (please tick where appropriate)		
			A1	A2	A3
1.	design and carry out psychological research under supervision;	30%	✓	✓	✓
2.	integrate knowledge of psychological theories and research skills into the planning, design and implementation of their research; and	40%	✓	✓	✓
3.	communicate effectively findings of psychological research in a scientific manner.	30%	✓	✓	
		100%			

*A1: Attitude*

*Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.*

*A2: Ability*

*Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.*

*A3: Accomplishments*

*Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.*

### 3. Teaching and Learning Activities (TLAs)

(TLAs designed to facilitate students' achievement of the CILOs.)

TLA	Brief Description	CILO No.						Hours/week (if applicable)
		1	2	3				
Supervision	Students learn to integrate knowledge in psychological theories and research to formulate their own research questions/hypotheses via individual supervision sessions In addition, students conducting similar research will meet with their supervisor in a group to report progress of their research and discuss issues of common concern.	✓	✓	✓				
Consultation sessions	Consultations on methodological, statistical and other technical issues will be provided by instructors/tutors. These sessions are expected to provide students with the guidance that enable them to process, analyze and interpret findings of their research in the most effective and accurate manner	✓	✓					

**Note:**

SS5798 and SS5798B are equivalent courses. The courses are designated for students in different modes of study admitted in 2021-22 or before. These courses cannot be repeated. Once started, switching between SS5798 and SS5798B is not allowed regardless of the changes in the mode of study. Only SS5798B will be offered to students admitted in 2022-23 or after.
