Part II Course Details

1. Abstract

This course aims to provide students with an understanding of the critical appraisal in current technology developments and reliability study of various fire engineering systems and to provide the students with the understanding the performance-based building fire codes and the performance-based codes for fire engineering systems.

2. Course Intended Learning Outcomes (CILOs)

No.	CILOs #	Weighting* (if applicable)	Discovery-enriched curriculum related learning outcomes (please tick where appropriate)		
			A1	A2	A3
1.	explore and understand the performance-based building fire codes and the performance-based codes for fire engineering systems;				
2.	evaluate and analyze the reliability of various fire engineering systems;				
3.	apply current technologies of fire engineering for the design simple fire services systems.				✓
* If weighting is assigned to CILOs, they should add up to 100%.		100%			

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.
