Remarks:

Active learning techniques, primarily in the form of simulations, will be used to deliver the practical training segment of the course. This methodology embraces a three stage process:-

- (i) the presentation of information and/or a demonstration;
- (ii) practice by the students; and
- (iii) the “debriefing” feedback stage.

In order to accommodate this strategy, this segment of the course will be taught in intensive mode in weekday evenings and/or weekend afternoons. The methodology will usually involve the entire class in the 1st and 3rd stages, with smaller groups working on simulations and observed by the instructor during the 2nd stage. Several 2nd stage simulations may be performed in one evening's instruction. As the training progresses, the simulation exercises will become more complex.

4. Assessment Tasks/Activities (ATs)

(ATs are designed to assess how well the students achieve the CILOs.)
