Part II Course Details

1. Abstract

To explore the theoretical foundations of one or more dominant schools of thought in the study of language, with reference to their methodological assumptions and achievements as manifested in investigations of the core areas of phonetic, phonology, syntax and semantics. Emphasis will be placed on modern linguistic theories, which may include major paradigms such as Saussurean theory, Prague School Linguistics, American Structuralism, Generative Grammar, and Functional Linguistics. When needed, the course may also cover the Pedagogical Grammar of English.

2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.
