

**City University of Hong Kong
Course Syllabus**

**offered by Department of Linguistics and Translation
with effect from Semester A 2024 / 25**

Part I Course Overview

Course Title:	<u>Human-Machine Interactive Translation</u>
Course Code:	<u>LT5628</u>
Course Duration:	<u>One Semester</u>
Credit Units:	<u>3</u>
Level:	<u>P5</u>
Medium of Instruction:	<u>English, supplemented by Chinese, in situations where English-Chinese translation is involved.</u>
Medium of Assessment:	<u>English, supplemented by Chinese, in situations where English-Chinese translation is involved.</u>
Prerequisites: <i>(Course Code and Title)</i>	<u>Nil</u>
Precursors: <i>(Course Code and Title)</i>	<u>LT5603 Theory of Translation LT5604 Translation Methodology LT5411 Computational Linguistics</u>
Equivalent Courses: <i>(Course Code and Title)</i>	<u>CTL5628 Human-Machine Interactive Translation</u>
Exclusive Courses: <i>(Course Code and Title)</i>	<u>Nil</u>

Part II Course Details

1. Abstract

This course aims to study the general principles and advanced technologies of machine translation (MT) and computer(-aided) translation (CAT), with a focus on the aspect of human-machine interaction to enhance the productivity in the translation industry. Students will acquire a critical understanding of relevant concepts, methodologies and practical techniques of MT/CAT through hands-on training. Making use of these concepts and techniques, they will be able to develop creative solutions to translation tasks and conduct high-quality and high-speed professional translation.

2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

No.	CILOs	Weighting (if applicable)	Discovery-enriched curriculum related learning outcomes (please tick ✓ where appropriate)		
			A1	A2	A3
1.	Identify and apply the key concepts, principles and methodologies in human-machine interaction involved in the practical use of MT/CAT for professional translation.		✓	✓	
2.	Apply the available technologies of MT/CAT for efficient and quality professional translation		✓	✓	✓
3.	Formulate strategies for efficient and effective use of various MT/CAT tools for language resource development for productivity enhancement		✓	✓	✓
4.	Evaluate MT/CAT systems and services by critiquing their translation quality and user-friendliness of facilities for human-machine interaction		✓	✓	✓
		100%			

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

3. Learning and Teaching Activities (LTAs)

(LTAs designed to facilitate students' achievement of the CILOs.)

LTA	Brief Description	CILO No.						Hours/week (if applicable)
		1	2	3	4			
1	Lectures towards the above outcomes to explain and illustrate the basic issues involved, for a practical solution for each of them	✓	✓	✓	✓			2 hours
2	Readings of lecture notes and selected chapters from textbooks and the user guides of available MT systems	✓	✓	✓	✓			
3	Tutorials to help students to resolve their problems involved in hand-on training; Question-answering sessions, exercises and practical work, discussion of assignments	✓	✓	✓	✓			1 hour

4. Assessment Tasks/Activities (ATs)

(ATs are designed to assess how well the students achieve the CILOs.)

Assessment Tasks/Activities	CILO No.						Weighting	Remarks
	1	2	3	4				
Continuous Assessment: 50%								
3-4 assignments on notions, principles and methodologies of MT/CAT and/or on translation practice using available MT/CAT system(s) (10% each);	✓	✓	✓	✓			10% each	
Participation in class and presentation (10%);	✓	✓	✓	✓			10%	
Quizzes (optional) (10%);	✓	✓	✓	✓			10%	
Examination: 50 % (duration: 2 hours) Two-hour examination on basic conceptions and know how about the MT/CAT system(s) in use. (CILO No. 1-4)								
							100%	

5. Assessment Rubrics

(Grading of student achievements is based on student performance in assessment tasks/activities with the following rubrics.)

Applicable to students admitted before Semester A 2022/23 and in Semester A 2024/25 & thereafter

Assessment Task	Criterion	Excellent (A+, A, A-)	Good (B+, B, B-)	Fair (C+, C, C-)	Marginal (D)	Failure (F)
1. 3-4 assignments	Knowledge, attitude, ability, creativity, accomplishment and performance in completing and/or presenting demons and/or assignments	1. Excellent knowledge of major issues, concepts, ideas, principles and techniques in human-machine interactive translation.	1. Good knowledge of major issues, concepts, ideas, principles and techniques in human-machine interactive translation. 2. Good application of linguistic and human-computer interaction knowledge to analysis and facilitation of basic tasks and key issues in translation.	1. Adequate knowledge of major issues, concepts, ideas, principles and techniques in human-machine interactive translation. 2. Fair application of linguistic and human-computer interaction knowledge to analysis and facilitation of basic tasks and key issues in translation.	1. Basic familiarity with the subject matter. 2. Marginal ability to apply linguistic and human-computer interaction knowledge to analysis and facilitation of basic tasks and key issues in translation.	1. Poor familiarity with the subject matter. 2. Poor ability or fail to apply linguistic and human-computer interaction knowledge to analysis and facilitation of basic tasks and key issues in translation.
2. Participation in class and presentation						
3. Quizzes	Marks	2. Excellent, creative application of linguistic and human-computer interaction knowledge to analysis and facilitation of basic tasks and key issues in translation. 3. Very active participation and high performance.	3. Active participation and good performance.	3. Adequate participation and fair performance.	3. Marginal participation and marginal performance.	3. Poor participation and poor performance.
4. Examination						

Applicable to students admitted from Semester A 2022/23 to Summer Term 2024

Assessment Task	Criterion	Excellent (A+, A, A-)	Good (B+, B)	Marginal (B-, C+, C)	Failure (F)
1. 3-4 assignments	Knowledge, attitude, ability, creativity, accomplishment and performance in completing and/or presenting demons and/or assignments	1.Excellent knowledge of major issues, concepts, ideas, principles and techniques in human-machine interactive translation.	1. Good knowledge of major issues, concepts, ideas, principles and techniques in human-machine interactive translation.	1. Adequate basic knowledge of major issues, concepts, ideas, principles and techniques in human-machine interactive translation.	1.Poor familiarity with the subject matter.
2. Participation in class and presentation					
3. Quizzes	Marks	2.Excellent, creative application of linguistic and human-computer interaction knowledge to analysis and facilitation of basic tasks and key issues in translation.	2. Good application of linguistic and human-computer interaction knowledge to analysis and facilitation of basic tasks and key issues in translation.	2. Fair or marginal application of linguistic and human-computer interaction knowledge to analysis and facilitation of basic tasks and key issues in translation.	2. Poor ability or fail to apply linguistic and human-computer interaction knowledge to analysis and facilitation of basic tasks and key issues in translation.
4. Examination					
		3.Very active participation and high performance.	3. Active participation and good performance.	3. Adequate or marginal participation and fair performance.	3. Poor participation and poor performance.
				4. Basic or marginal familiarity with the subject matter as a whole.	

Part III Other Information (more details can be provided separately in the teaching plan)

1. Keyword Syllabus

(An indication of the key topics of the course.)

1. Machine translation (MT) and Computer-aided translation (CAT) vs. fully-automatic and high-quality translation (FAHQT); CAT vs. human-aided machine-translation (HAMT).
2. The "Proper place" of human and machine in translation industry: Routine work for machine and creative work for human; Analysis of translation process and necessary tools, translation quality vs. productivity.
3. Basic principles and practices of human-machine interactions in translation industry.
4. Human-machine interaction for language resource development to enrich MT/CAT, towards a fuller utilization of language technologies.
5. Practical training for hands-on experience of using available MT system(s) and CAT tools for high-quality and high-speed professional translation.
6. Current development of MT/CAT technologies from the perspective of translation studies.

2. Reading List

2.1 Compulsory Readings

(Compulsory readings can include books, book chapters, or journal/magazine articles. There are also collections of e-books, e-journals available from the CityU Library.)

1.	Lecture notes/slides for the course
2.	Selected papers/chapters on topics of human-machine interactive translation
3.	Selected tutorials on key tasks of human-computer interaction in system implementation

2.2 Additional Readings

(Additional references for students to learn to expand their knowledge about the subject.)

1.	Relevant chapters in the recommended reading list or from online tutorial
2.	Advanced and/or related topics on human-computer interaction in translation
