Handbook on Human Rights in China (Edward Elgar Publishing, 2019)

Sarah Biddulph and Joshua Rosenzweig (eds)

Examining both the theory and practice of human rights in China, this Handbook provides an important analysis of rights in China in comparison with international standards and China's international engagement concerning human rights. A wide range of civil and political, social and economic, and group rights in China are explored from an interdisciplinary perspective.

Contributions provide a comprehensive and critical insight into the topic, from examining the traditions behind human rights in China, right up to contemporary issues such as the rise of the Internet and LGBTQ rights that are now at the forefront of global attention. The Handbook also explores human rights in Greater China, and their relationship to rights in mainland China. Each chapter develops arguments on significant human rights issues, together revealing a complex reality where human rights recognition and protections are intertwined with Party-state programs, priorities, modes of governance and the demand for social and political stability.
