

Law and Technology Advance Seminars No. 3

GENERATIVE AI AND COPYRIGHT – WHERE ARE WE NOW?

Abstract

Generative AI has caused so much disruption that there is not a seminar, workshop or conference that does not address the impact of such technology on whatever sphere of human endeavour is being discussed. Last year APCA has hosted a webinar titled “Generative AI, Copyright and Beyond” featured all the invited speakers, and the 2023 APCA Annual Conference hosted in Bangkok on 20 & 21 November 2023 was focusing on the theme “Creative Content and New Technologies” and many papers were addressing the generative AI phenomenon. This time, we will move the stage to School of Law, City University of Hong Kong to continue our discussion, focussing on the numerous developments that have taken place in less than 12 months since the last seminar, warming up for the upcoming 2024 APCA Annual Conference co-hosted by School of Law, City University of Hong Kong later this year.

Professor Natalie Stoianoff, APCA President, will be moderating this session featuring Neeraj Panchal (Senior Intellectual Property Counsel, John Deere), Professor Ed Santow (Co-Director of the Human Technology Institute) and Jane Rawlings (Barrister and Lecturer, UTS Postgraduate IP Program).

Opening address

Prof. He Tianxiang, Associate Professor, School of Law, City University of Hong Kong, APCA Vice President.

TUESDAY
23 JULY 2024
