Abstract

This presentation will describe the possibilities of student exchanges at the bachelor, master and doctoral levels at Université Grenoble Alpes (UGA) for CityU students. A focus will be made on the longstanding collaboration between CityU and UGA in reliability theory and engineering.

About the Speaker

Olivier Gaudoin is a Professor of Statistics at Grenoble INP, Institute of Engineering and Management at Université Grenoble Alpes (UGA), France. He is a Director of International Relations at Grenoble INP-Ensimag, the Graduate School of Applied Mathematics and Computer Science. His research interests are probabilistic modelling and statistical analysis for the reliability of complex systems, including ageing, maintenance and degradation modelling, competing risks and goodness-of-fit testing.
