

CA3342: ARCHITECTURE, SMART CITIES AND DESIGN

Effective Term

Semester A 2022/23

Part I Course Overview

Course Title

Architecture, Smart Cities and Design

Subject Code

CA - Civil and Architectural Engineering

Course Number

3342

Academic Unit

Architecture and Civil Engineering (CA)

College/School

College of Engineering (EG)

Course Duration

One Semester

Credit Units

3

Level

B1, B2, B3, B4 - Bachelor's Degree

Medium of Instruction

English

Medium of Assessment

English

Prerequisites

Nil

Precursors

Nil

Equivalent Courses

Nil

Exclusive Courses

Nil

Part II Course Details

Abstract

The course aims to introduce concepts and issues in urbanism and in design relevant to students of architecture and the built environment, including the role of technology in enabling spatial analysis, production, management and urban life.

Course Intended Learning Outcomes (CILOs)

CILOs	Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	discuss concepts of cities, and their relationships to urban form and to design;	x		
2	discuss key aspects of urban form, and their relationships to design, urban life and value;	x	x	
3	identify various urban stakeholders, understand their roles and claims to the city;	x	x	x
4	generate simple design solutions;	x	x	x
5	describe and analyse design configurations.	x	x	x

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

Teaching and Learning Activities (TLAs)

TLAs	Brief Description	CILO No.	Hours/week (if applicable)
1	Lectures, seminars, workshops	Lecture, seminar or workshops on topics listed in keyword syllabus	1, 2, 3, 4, 5
2	Fieldwork and practical work	Observing and recording the urban environment, develop design solutions	3, 4, 5

Assessment Tasks / Activities (ATs)

ATs	CILO No.	Weighting (%)	Remarks (e.g. Parameter for GenAI use)
1	Observation and Design Exercises	3, 4, 5	60
2	Reflection Exercise	1, 2, 3, 4, 5	40

Continuous Assessment (%)

100

Examination (%)

0

Assessment Rubrics (AR)

Assessment Task

Observation and Design Exercises

Criterion

Ability to record urban observations and develop design skills Accomplishment to demonstrate design alternatives

Excellent (A+, A, A-)

Strong evidence of original thinking; good organization, capacity to analyse and synthesize; superior grasp of subject matter evidence of extensive knowledge base

Good (B+, B, B-)

Evidence of grasp of subject, some evidence of critical capacity and analytic ability; reasonable understanding of issues; evidence of familiarity with

Fair (C+, C, C-)

Student who is profiting from the university experience; understanding of the subject; ability to develop solutions to simple problems in the material

Marginal (D)

Sufficient familiarity with the subject matter to enable the student to progress without repeating the course

Failure (F)

Little evidence of familiarity with the subject matter; weakness in critical and analytic skills; limited, or irrelevant use of literature.

Assessment Task

Reflection Exercise

Criterion

Attitude to critically challenge conventional strategies in urban design, and in the application of information technology in cities

Excellent (A+, A, A-)

Strong evidence of original thinking; good organization, capacity to analyse and synthesize; superior grasp of subject matter evidence of extensive knowledge base

Good (B+, B, B-)

Evidence of grasp of subject, some evidence of critical capacity and analytic ability; reasonable understanding of issues; evidence of familiarity with

Fair (C+, C, C-)

Student who is profiting from the university experience; understanding of the subject; ability to develop solutions to simple problems in the material

Marginal (D)

Sufficient familiarity with the subject matter to enable the student to progress without repeating the course

Failure (F)

Little evidence of familiarity with the subject matter; weakness in critical and analytic skills; limited, or irrelevant use of literature.

Part III Other Information**Keyword Syllabus**

Contemporary urban design issues around the world; city forms and its relationship to urban structure, movement, space and spatial experience, and how different stakeholders value those experiences; urban design concepts and approaches; techniques for generating city form; street design.

Reading List**Compulsory Readings**

	Title
1	Carmona, M., Heath, T., Oc, T. and Tiesdell, S., 2012. Public places-Urban spaces. Routledge.
2	Cross, N., 2011. Design thinking: Understanding how designers think and work. Berg.
3	Gehl, Jan and Svarre, Birgitte (2013) How to Study Public Life, Washington D.C.: Island Press (available at http://link.springer.com/book/10.5822%2F978-1-61091-525-0)
4	Homes & Communities Agency (2007) "Urban Design Compendium 1," Urban Design Principle (UDC1), UK: Llewelyn Davies Yeang
5	Jacobs, Jane (1961) "The Life and Death of Great American Cities" New York: Modern Library.
6	NACTO (2016) Global Streets Design Guide https://globaldesigningcities.org/publication/global-street-design-guide/
7	Townsend, A.M., (2013). Smart cities: Big data, civic hackers, and the quest for a new utopia. WW Norton & Company.
