

# CA2343A: ARCHITECTURAL DESIGN - SPACE MAKING (TOPIC 1)

## New Syllabus Proposal

---

### Effective Term

Semester A 2023/24

## Part I Course Overview

### Course Title

Architectural Design - Space Making (Topic 1)

### Subject Code

CA - Civil and Architectural Engineering

### Course Number

2343A

### Academic Unit

Architecture and Civil Engineering (CA)

### College/School

College of Engineering (EG)

### Course Duration

One Semester

### Credit Units

6

### Level

B1, B2, B3, B4 - Bachelor's Degree

### Medium of Instruction

English

### Medium of Assessment

English

### Prerequisites

Nil

### Precursors

Nil

### Equivalent Courses

CA2343B Architectural Design - Space Making (Topic 2)

### Exclusive Courses

Nil

## Part II Course Details

### Abstract

The aim of this course is to let students experience and get accustomed with space making processes, steps and impacts. The specific topic, selected by the studio tutor, will target at the design of a small building with focus in forming space for function and experience. Forming space problematic is understood in this course as a field of explorations in order to understand interactions between shape, function and design intentions. The content of the course will allow students to understand the potentials of design strategies and their impact into the built environment and people' s life.

### Course Intended Learning Outcomes (CILOs)

CILOs		Weighting (if app.)	DEC-A1	DEC-A2	DEC-A3
1	Collect and organise information from various sources to facilitate the preparation of design proposals.		x	x	
2	Explore space making process in the context of a building project.		x	x	
3	Understand and apply design consideration of users, space, functions, and expression of forms in a building project.		x	x	
4	Formulate a design proposal in response to the shape and form, function and space, and design intentions.				x
5	Develop architectural design proposals to satisfy the users and programme requirements.				x

#### A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

#### A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to real-life problems.

#### A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

### Teaching and Learning Activities (TLAs)

TLAs		Brief Description	CILO No.	Hours/week (if applicable)
1	Design Project	Design Project engages students in the production of an integrated proposal for a building design of a specific topic in response to a set of constraints and requirements. Teaching and learning are conducted through regular studio classes in which students will develop their individual design proposals under the facilitation of a studio tutor.	1, 2, 3, 4, 5	6 hrs/ week

**Assessment Tasks / Activities (ATs)**

ATs	CILO No.	Weighting (%)	Remarks (e.g. Parameter for GenAI use)
1	Interim Presentation	1, 2, 3	30
2	Final Presentation	3, 4, 5	50
3	Assignments (such as reports, portfolio and others)	1, 4	20

**Continuous Assessment (%)**

100

**Examination (%)**

0

**Assessment Rubrics (AR)****Assessment Task**

1. Interim Presentation

**Criterion**

1.1 Thorough space making process in the context of a building project.

1.2 Demonstrate ability to organise information from various sources to facilitate the preparation of design proposals.

1.3 Thorough and skilful application of design consideration of users, space, functions, and expression of forms in a building project.

**Excellent (A+, A, A-)**

High

**Good (B+, B, B-)**

Significant

**Fair (C+, C, C-)**

Moderate

**Marginal (D)**

Basic

**Failure (F)**

Not even reaching marginal level

---

**Assessment Task**

2. Final Presentation

**Criterion**

2.1 Thorough and skilful application of design consideration of users, space, functions, and expression of forms in a building project.

2.2 Formulate an innovative design proposal in response to the shape and form, function and space, and design intentions.

2.3 Develop and communicate a comprehensive architectural design proposals to satisfy the users and programme requirements.

**Excellent (A+, A, A-)**

High

**Good (B+, B, B-)**

Significant

**Fair (C+, C, C-)**

Moderate

**Marginal (D)**

Basic

**Failure (F)**

Not even reaching marginal level

---

**Assessment Task**

3. Assignments (such as reports, portfolio and others)

**Criterion**

3.1 Documentation of a thorough space making process in the context of a building project, or the comprehensive design proposal to illustrate the satisfaction of users and programme requirements.

**Excellent (A+, A, A-)**

High

**Good (B+, B, B-)**

Significant

**Fair (C+, C, C-)**

Moderate

**Marginal (D)**

Basic

**Failure (F)**

Not even reaching marginal level

## Part III Other Information

### Keyword Syllabus

Architectural design: Small-scale building development; space making process; exploring the potential of the architecture; space, form and function, translating intentions into design strategies.

Design integration: Users and programme strategies in design; integration of space, form and functions.

Communication: Intermediate graphic, presentation models and oral presentation.
