Part II Course Details

1. Abstract

(A 150-word description about the course)

This course aims to:

- a) provide students opportunities to study, on an intensive basis, an existing or emerging area of law so as to meet the challenges of working in a global environment;
- b) allow students to get exposed to leading foreign legal scholars who might be willing to spend few weeks at our Law School to offer a course;
- c) offer more flexibility to students to plan and complete their studies; and.
- d) develop further the research and analytical abilities of students.

2. Course Intended Learning Outcomes (CILOs)

(CILOs state what the student is expected to be able to do at the end of the course according to a given standard of performance.)

Although exact CILOs are likely to vary from seminar to seminar and will be determined by the visiting faculty and/or the course leader, below is a tentative outline of what CILOs might look like.

No.	CILOs	Weighting* (if applicable)	DEC related learning outcomes		
			A1	A2	A3
1.	Describe and explain the basic concepts and principles related to the given seminar			✓	
2.	Apply the concepts and principles to solve hypothetical or real situations			✓	✓
3.	Communicate ideas, arguments or advice clearly and coherently both orally and in writing		✓	✓	✓
4	Critically analyse and evaluate concepts, principles and policy underpinning the area of law covered by the seminar		✓	✓	✓
		100%			

* If weighting is assigned to CILOs, they should add up to 100%.

A1: Attitude

Develop an attitude of discovery/innovation/creativity, as demonstrated by students possessing a strong sense of curiosity, asking questions actively, challenging assumptions or engaging in inquiry together with teachers.

A2: Ability

Develop the ability/skill needed to discover/innovate/create, as demonstrated by students possessing critical thinking skills to assess ideas, acquiring research skills, synthesizing knowledge across disciplines or applying academic knowledge to self-life problems.

A3: Accomplishments

Demonstrate accomplishment of discovery/innovation/creativity through producing /constructing creative works/new artefacts, effective solutions to real-life problems or new processes.

3. Teaching and Learning Activities (TLAs)

(TLAs designed to facilitate students' achievement of the CILOs.)

TLA	Brief Description	CILO No.				Hours/week (if applicable)
		1	2	3	4	
1	Lectures or interactive seminars – students will acquire basic knowledge of the relevant concept and principles, including by asking or responding to questions	✓				
2	Group discussions/exercises – students will get an opportunity to apply law or legal principles to practical situations; Tutorials – students will apply their understanding of legal concepts and principles to solve hypothetical situations		✓			
3	Tutorials – oral presentations and written submissions; Consultations			✓		
4	Lectures or interactive seminars – students will develop critical analytical abilities by observing and participating in discussions; Guided reflective pre/post-class reading				✓	

A range of TLAs are likely to be employed to achieve CILOs prescribed for a seminar. The combination and duration of the TLAs will be determined as per the needs of a particular seminar, which might in a given case be taught – wholly or in part – through video-conferencing facilities. Nevertheless, below is an indicative list of TLAs.

4. Assessment Tasks/Activities (ATs)

(ATs are designed to assess how well the students achieve the CILOs.)

Again, although precise assessment tasks will be determined the visiting faculty and/or the course leader so as to ensure a proper alignment with CILOs and TLAs, few potential assessment tasks are specified below. Taking into account the nature of the subject and the duration of the course, the visiting faculty and/or the course leader will decide if the assessment will be wholly by coursework or by a combination of coursework and examination. The nature of examination (whether closed book or open book) will also be determined by the visiting faculty and/or the course leader. The exact assessment tasks will be notified to students at the beginning of the course.

Assessment Tasks/Activities	CILO No.				Weighting	Remarks
	1	2	3	4		
Continuous Assessment: to be decided by the individual course leader						
Participation in tutorials and other exercises	✓	✓	✓	✓		
Coursework and/or End-of-course examination: to be decided by the individual course leader						
					100%	

5. Assessment Rubrics

(Grading of student achievements is based on student performance in assessment tasks/activities with the following rubrics.)

Assessment Task	Criterion	Excellent (A+, A, A-)	Good (B+, B, B-)	Fair (C+, C, C-)	Marginal (D)	Failure (F)
1. Attendance and participation in tutorials and other exercises presentation)	Demonstration of concentration on tutorials and other exercises. Demonstration of ability and willingness to answer questions in tutorials and to participate in group discussion. Demonstration of oral presentation skills and willingness.	Strong evidence of original thinking; good organization, capacity to analyse and synthesize; superior grasp of subject matter; evidence of extensive knowledge base.	Evidence of grasp of subject, some evidence of critical capacity and analytic ability; reasonable understanding of issues; evidence of familiarity with literature.	Student who is profiting from the university experience; understanding of the subject; ability to develop solutions to simple problems in the material.	Sufficient familiarity with the subject matter to enable the student to progress without repeating the course.	Little evidence of familiarity with the subject matter; weakness in critical and analytic skills; limited, or irrelevant use of literature.
2. End-of-course examination	Demonstration of understanding of concepts, principles, and theories. Demonstration of ability to identify legal issues. Application of knowledge to specific legal problems, to discuss questions, and to comment on legal phenomenon. Application of legal writing and research skills. Demonstration of ability to engage in argument-based analysis based on critical thinking. Demonstration of aptitude for formulating innovative solutions to designated fact-based questions.	Strong evidence of original thinking; good organization, capacity to analyse and synthesize; superior grasp of subject matter; evidence of extensive knowledge base.	Evidence of grasp of subject, some evidence of critical capacity and analytic ability; reasonable understanding of issues; evidence of familiarity with literature.	Student who is profiting from the university experience; understanding of the subject; ability to develop solutions to simple problems in the material.	Sufficient familiarity with the subject matter to enable the student to progress without repeating the course. LW4662C International Commercial Arbitration

This course offers an introduction into International Commercial Arbitration (ICA) and highlights different aspects of ICA, such as:

Characteristics of ICA in Practice

The Arbitration Agreement and the applicable Law

Arbitrators and Arbitration Proceedings

The Arbitral Award – Effects and Limits

The students will be accustomed i.a. with the Brussels I Regulation, the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards (1958), the European Convention on Commercial Arbitration (1961) and other sources. Basic knowledge of Private International Law (including International Civil Procedure) is desirable.

LW4662D Labour Law and Post-Industrial Work Relations in HK, the U.K., and the U.S.

This is a course in comparative labour law. We will examine several policy challenges posed by the growth of “post-industrial” work relations in three advanced economies and common law jurisdictions: the United Kingdom, Hong Kong, and the United States. Over the past several decades, all three places have experienced a relative decline in what scholars and practitioners have referred to as “industrial,” or “standard,” employment: a full-time, long-term or secure, and direct relationship between a worker and large firm, where the worker carried out routinized tasks under a clear managerial hierarchy and often received benefits and sustainable pay. A mix of law, collective bargaining, and custom was responsible for institutionalizing and maintaining this relationship. Now, global competition, the growth of the service sector, the re-orientation of economic activity towards financial markets, new strategies of profit-making, and state policy have eroded the institutional footing of industrial employment. In its stead, irregular, low-wage, indirect, and insecure employment has burgeoned. Using case studies, the course will explore two principal questions: (1) How does post-industrial work challenge assumptions embedded within current labour law regimes? (2) How might we transform labour law in order to meet the challenges of governing post-industrial work and managing its social and economic consequences? Topics we will address in interrogating these questions include the following:

- Identifying who has rights or obligations under labour law, particularly in indirect employment involving subcontracting, labour intermediaries, and buyer-driven supply chains
- Job security and labor market security
- Working hours
- Benefits
- Health and safety
- Unionization and other modes of worker organization
- Implementing and enforcing labour law
- The benefits and limits of a comparative approach to labour law

LW4662E Patent Searching Activities, Strategic Use of Patent Information & Patent Information Search Drills

This advanced course on Patent Information Search aims to introduce and illustrate comprehensively the concepts of searching patent information. Practical activities have been incorporated throughout the course to complement theoretical principles that underpin patent information searching. Course participants are also furnished with in-depth information regarding sources, techniques and data used during patent searches.

LW4662F Techniques for Searching Patent Documents and Patent Searching – Practical Aspects

This advanced course on Patent Information Search aims to introduce and illustrate comprehensively the concepts of searching patent information. Practical activities have been incorporated throughout the course to complement theoretical principles that underpin patent information searching. Course participants are also furnished with in-depth information regarding sources, techniques and data used during patent searches.
